

Shiow-Ru Chang is a professor in the School of Nursing at National Taiwan University. She is also associate director in the Department of Nursing, National Taiwan University Hospital. Her research focuses on the women health and maternal care. Her work examines the bio-psychological changes and health indicators during the transitional period over women's life span (e.g. menarche, pregnancy, childbirth, menopause, disease, employment). Her research interests include pain, urinary incontinence, sexual function, depression, and how bio-psycho-social-cultural issues shape the transformation of self-identity during many transitions.
